

FIBER COMPOSITES, L.L.C.

FIBER COMPOSITES LAUNCHES EXTENSIVE NEW WEB SITE

New London, NC – January 12, 2009—Fiber Composites, LLC, a leading manufacturer of alternative decking, railing and fencing products, has launched an innovative, feature-rich, new web site. The web site provides in-depth information on Fiberon® branded products which include new Horizon™ composite decking with PermaTech™ innovation and new Sensibuilt™ PVC decking. Also featured are Professional, Premium Grain, and Tropics® decking; Fiberon Horizon Plus™ railing products to complement its deck boards; and composite fencing products promoted under the Enclave™ sub brand.

“Fiber Composites is fully committed to delivering an engaging, highly interactive and informative online presence as a primary focus of our marketing communications strategy. We recognize that both consumers and professionals are increasingly dependent on the web to become informed and learn about new products and trends.” said Chris H. Beyer, Vice President of Marketing.

The new web site offers many new innovative features including a deck design tool that allows homeowners to design a new deck and save the design for future use and reference. Interactive tools uniquely demonstrate the features of new Horizon decking as well as extensive imagery and information about all Fiberon brands. Professionals can sign up for the ‘FiberPro™’ deck builder program which provides extensive business building tools that can enhance their marketing capability. Additionally, the site features a deck gallery where professionals can feature completed deck projects for homeowners to get ideas for their own future deck designs. View the new web site at <http://www.fiberondecking.com>.

About Fiber Composites

Fiber Composites, LLC is a leading manufacturer of composite decking, railing and fencing used in homes and light commercial construction across North America. Its Fiberon brand product line is designed specifically for professional contractors. Fiber Composites’ polymer chemists and extrusion professionals employ the latest technology to constantly innovate, using the finest raw materials coupled with leading manufacturing processes to ensure best-in-class quality. Fiber Composites was founded in 1997 and is a privately owned company with operations in North Carolina and Idaho.
